

Fan/Louver Temperature Controller

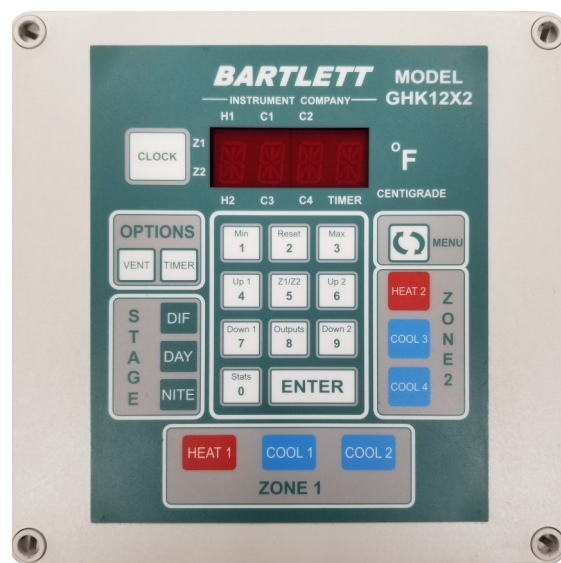

GHK12X2

BARTLETT

— INSTRUMENT COMPANY —

Replace your thermostats with this easy-to-use, affordable temperature controller for fan/louver houses!

The GHK12X2 temperature controller enables you to control **two** heat and **four** cool steps in the single zone mode. In the two zone mode it will control 2 independent zones each with 1 heat and 2 cool steps. GHK12X2 controllers have programmable temperature settings in **DIF**, **DAY** & **NITE** stages. Each heat or cool step has an automatic or manual setting. It can be configured to have 1 proportional output option and a 3rd source heat option.

Other features include a cycle **timer** for irrigation, misting, or lights; a **vent** stage for dehumidification; an **alarm** output for high or low temperatures, power loss or hardware trouble; and **statistics** for high, low and average temperatures for the past 7 days. Our **C.I.S Software** is available for the option of connecting up to 99 greenhouse controllers to a personal computer for easy programming and monitoring.
