Computer Interface System
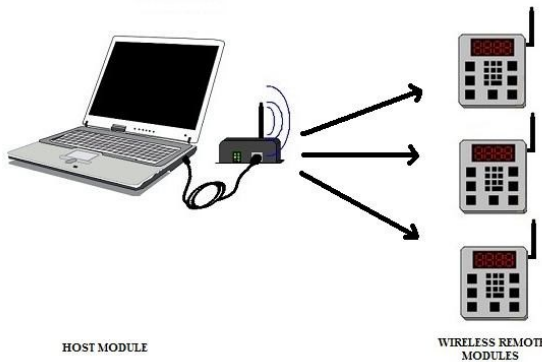

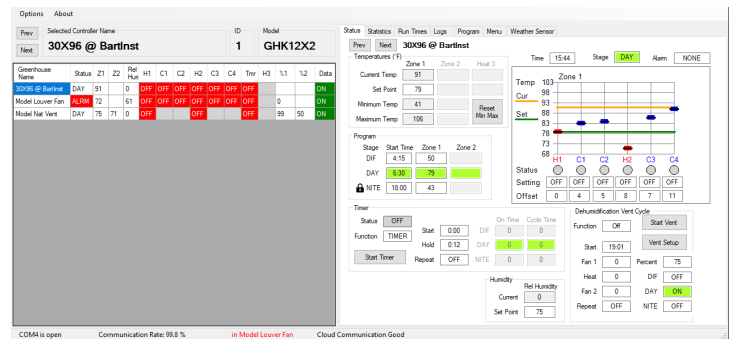

C.I.S.

BARTLETT
— INSTRUMENT COMPANY —

Remotely access and control up to 99 greenhouses from 1 PC!

CIS (Computer Interface System) connects up to **99 greenhouse controllers** to a personal computer. It is used to **control and monitor** each greenhouse. The main screen will show the current settings and conditions for each greenhouse and in depth settings on the selected greenhouse. Allows for **text and email alerts** when any alarm condition is reached. CIS provides **automatic data graphing** that can be accessed directly in the program or exported to a separate program. With the use of our **Headgrower** app, you can access your greenhouse from anywhere in the world which makes CIS a great growing tool for any grower!

HOST MODULE

WIRELESS REMOTE MODULES

- Control & monitor up to 99 greenhouses from one PC
