# The Vent Boss

“The Best Boss You’ll Ever Have”

The Vent Boss from Bartlett Instrument Company is a 24 VDC power supply designed to control two separate 5A motors for roll up/down walls. It is a great companion for 24 VDC motors providing time and labor savings for many growers. Its features include:

- 24 VDC power supply
- Controls for two separate 5A motors for roll up/down walls
- Manual or Automatic controls
- Resettable circuit breakers for unit protection
- Time and money saver
- Affordable

To use the automation features, add the Bartlett RWL11X2 environmental controller. When combined with the RWL11X2, you can take advantage of the DIF, DAY, and NITE temperature stages along with the other features of that unit.

Whether you would like to manually operate your motors or use the automation features, the Vent Boss can be a great, affordable addition to any greenhouse.
