# Did You Know About Our 3rd Heat Option?

[Home](#) • [Controller Overview](#) • [GHK12X2H](#) • [RWL11X2](#)

Did you know you our GHK12X2 offered a 3rd heat option? The Heat 3 output is a set point heat with its own separate temperature sensor. It can be used for turning on a boiler based on outdoor temperature or controlling a bench heater. One thing to note with the 3rd heat, it is not connected to the target temperature and does not change with the stage as the target temperature does.

The Heat 3 option is easy to install. With just a small addition to the relay board inside the controller, you'll be up and running a 3rd heat in no time. You also have the option of adding an additional curtain control at the same time as the heat for a nominal cost.

Interested in adding this to your greenhouse? Give us a call at 319-272-8366 to find out what you'll need! You can also check out our website at [www.bartinst.com](http://www.bartinst.com) for more info.
