Programming and saving a custom bisque or glaze with the Genesis controller is really easy. Programming for a bisque or glaze using the Genesis takes just a few steps. When you are ready to start a firing with the same settings, it's simple to reload or check the settings and start the new firing. If you switch from a bisque to a glaze or custom firing, the settings for the bisque will be the same when you load a bisque firing later.

To program the Genesis for a Bisque program, follow these steps:

- From the Home Screen, press the LOAD button
- Press 1-Bisc and a screen will pop up saying the program has been loaded.
- Press OK and you'll return to the home screen.
- Press EDIT to see each setting. Settings to be modified are: Preheat Time, Cone #, Speed, Hold At Peak, and Cooling.
- Once finished making changes, press SAVE and the controller will return to the Home Screen

Want to learn more about the new Genesis controller, check out our [YouTube videos](#) or our [website](#) for more information.
