Need A Standalone Control Box But Don't Know Where to Look?

[Home](#) • [Overview](#) • [V6CF](#) • [RTC1000](#) • [3Key](#) • [Genesis](#)

Getting all the necessary parts to build your own control box can be quite the chore and for some, building your own is out of the question entirely. While we don't build them ourselves, many kiln manufacturers offer them as an option for their customers. Purchasing a standalone control box will add everything you'll need to add a controller to a kiln that currently has manual controls.

As I mentioned, we don't build them here at Bartlett, we just make the controllers. However, if you check our website [here](#) you can find a number of manufacturers willing and ready to help you on your way to adding controls to your kiln.

Not sure what you need or unsure of where to start to get a controller? Give us a call and we'll be happy to help.
