Make Installing Your Controller Easy With Our Easy-Wire!

[Home](#) • [Controller Overview](#) • [GHK](#) • [RWL](#) • [CIS](#) • [W/R Alarm](#)

The variety of Bartlett Easy-Wire packages make your controller installation *a piece of cake*. Every Easy-Wire we make, we build custom for each customer to fit their needs. Instead of worrying about relays for each piece of equipment, we have that all ready for you in one central location. All you have to do is run the wires to your equipment and you're on your way to controlling your greenhouse in an easier, more efficient way. This can greatly decrease the amount of time it takes to set up a new greenhouse or even when adding controls to an existing greenhouse.

The Easy-Wires come with either the GHK12X2 (for louver fan houses) or the RWL11X2 (for natural vent houses) controller attached which allows for easy programming and control. The GHK12X2 Easy-wires have all the great features the GHK12X2 has to offer and can control additional equipment like single or dual speed fans as well as proportional ventilation equipment depending on the model.

The Easy-Wire packages from Bartlett can make install a breeze and get your greenhouse up and running in no time. Call us with a list of equipment you'd like to control, and we can get you set up with an Easy-Wire of your own!
