So, you've recently upgraded your kiln controller to a Bartlett touch screen, Genesis 2.0 or Genesis Mini, what now? Download our *free* KilnAid app in the Google Play store and Apple App store!

KilnAid is a free app that can be downloaded in the Google Play Store or Apple App store. Once you download the app, set up an account, and claim your kiln, you will be monitoring your kiln progress in no time.

Included features
-Remote monitoring
-Claim and view each of your kilns
-List view shows limited status for all kilns
-Alarm at the controller will send an alarm to app

KilnAid set up is easy, but for extra assistance be sure to check out our Youtube videos for step by step directions!

Having difficulties getting controller information to the app? Make sure your phone and controller are connected to Wi-Fi before firing. It is also important to stay up to-date on app firmware updates. Need a refresher on how to download the latest firmware? Subscribe to our Youtube channel to view videos like this one, for a step-by-step guide. Also, if using an iPhone as a mobile hotspot, make sure the SSID on your device does not have an apostrophe.

We would like to thank everyone for taking our KilnAid survey. We are currently evaluating the feedback in order so we can enhance the user experience in the upcoming months.
