

# BARTLETT

## — INSTRUMENT COMPANY —

Welcome to Bartlett Instrument's May, 2021 kiln newsletter. This month we've heard from a lot of teachers wrapping up for the summer. Summer means more time outside and more time away for your kiln. It doesn't mean you have to just trust your firing is going as planned. This month's newsletter outlines how to set up your controller with the KilnAid app - both in video and step by step instructions format.

### Wondering if the Genesis is right for you?

Our Genesis 2.0 and Genesis Mini both have many features that suitable for many different artist, such as touch screen technology, different user interface levels, graphical display of the firing process, up to 32 segments per program and WiFi enabled for easy software updating, as well as KilnAid connection.

### Need help?

Our [YouTube channel](#), [FAQs](#) and [troubleshooting](#) pages have the answers you need. Don't see what you're looking for - [email us](#) or [ask your question here!](#)

The image is a video thumbnail for a tutorial titled "GENESIS/GENESIS MINI KILNAID SETUP". It features two screenshots of the KilnAid app interface. The left screenshot shows the "Kiln Info" screen with fields for Setting, Value, Version (3.24.0), Serial# (01232018), MAC (5ccf7f1272), and Network (BartGuest), along with "BACK" and "GRAPH" buttons. The right screenshot shows the "Kiln: Genesis" status screen with fields for Idle, Glaze, Temperature (78°F), Firing Time (0:00), and Last Update (5/17/2019, 1:05 PM). A large red play button is centered over the screenshots. The Bartlett Instrument Company logo is at the bottom.

For additional information on connecting your Genesis controller and KilnAid as well as updating your firmware, subscribe to our YouTube Channel!

## KilnAid Connection Steps

1. If you haven't already, download KilnAid in the [Google Play Store](#) or [Apple App Store](#).

Once downloaded, create an account. After you create an account, you will receive a confirmation email from sales@bartinst.com with instructions.

If you do not see the email please check you junk mail before calling in for assistance.

2. Next make sure your controller is connected to WiFi. If your controller is not connected it will not send firing information to KilnAid. To connect to WiFi press the following (in order):

**Menu**  
**Configuring**  
**Communications**  
**WiFi Setup**

3. Great! Now your controller is connected to WiFi. We recommend you ensure you have the latest firmware for security and feature updates. To download/update firmware press the following:

**Menu**  
**Configuration**  
**Communications**  
**Update Firmware**

\*\*It is advised to ensure you have the latest firmware every 3 months

4. Final step - claim your kiln with the app. In your Genesis controller, press the following keys:

### Menu

### Data Menu

### Kiln info

In KilnAid, press the + sign on the top right corner. Enter the serial number, mac address and a name for your kiln to add to your claimed kilns!

**Have questions? Feel free to ask!**

**Customer Support is available Monday - Friday 8:00AM - 4:30PM CDT**

**When we are not available refer to our [YouTube Channel](#), social media outlets or past e-newsletters for support.**

**Ask Us a Question!**
